

Stage 5 Design and Technology – Marketing

Summary

Successful design ideas require marketing to ensure that it is being taken up by the product/service's intended target market. Marketing is the process of using research and advertising to promote products or services.

Duration

10 weeks

Outcomes

- DT5-1 analyses and applies a range of design concepts and processes
- DT5-2 applies and justifies an appropriate process of design when developing design ideas and solutions
- DT5-3 evaluates and explains the impact of past, current and emerging technologies on the individual, society and environments
- DT5-4 analyses the work and responsibilities of designers and the factors affecting their work
- DT5-6 develops and evaluates creative, innovative and enterprising design ideas and solutions
- DT5-7 uses appropriate techniques when communicating design ideas and solutions to a range of audiences

[Design and Technology 7–10 Syllabus](#) © NSW Education Standards Authority (NESA) for and on behalf of the Crown in right of the State of New South Wales, 2019

Unit overview

Students will design the marketing and stall set up for a school fete – a food stall or activity stall, or the sale of one of their previous projects. Students are to work with a 'client' (the stallholder, for example, the year group/ homeroom/ teacher running the fete stall or a fellow class member who will be selling/displaying their work) to develop a marketing plan by researching and analyzing information regarding the product and its target market. Students will utilize communication skills to liaise with their client and to create advertising material for the stall.

Resources overview

The resources and links listed below are referenced within the program but is not an exhaustive list of resources available. Teachers can add to these resources as needed.

Physical resources

- Student and teacher Booklet 'Sell, sell, sell!!!'

YouTube

- [The Secret Behind Coca-Cola Marketing Strategy](#) (duration 8:15)
- [Beginning Graphic Design: Fundamentals](#) (duration 6:26)
- [The 4 Ps of The Marketing Mix Simplified](#) (duration 2:46)
- [Beginning Graphic Design: Branding & Identity](#) (duration 6:25)
- [Alice Thorpe's Logo Design](#) (duration 8:51)
- [The Marketing Plan](#) (duration 2:33)

Websites

- copyright.org.au – an introduction to copyright in Australia PDF
- business.gov.au – business names
- ipaustralia.gov.au – Intellectual property and trademarks

<p>processes and solutions against criteria for success</p> <ul style="list-style-type: none"> • evaluate the short and long-term consequences of design projects on the individual, society and the environment • justify and document decisions made during the development of design projects • self-assess and peer-assess design processes and solutions 	<ul style="list-style-type: none"> • Students are to design a feedback form for the client to give to customers at the Fete. • Review sales and customer feedback from the event. • Reflection on the design process • Reflection on marketing products and strategy 	<p>client to use with customers during the event.</p> <ul style="list-style-type: none"> • Students use information collected from feedback and sales to evaluate the marketing plan. • Students reflect on and evaluate their design process. 	

Evaluation

Evaluation of learning activities should be an ongoing process that happens throughout the delivery of this unit. Teachers should document their evaluation of learning activities throughout the program. The space provided below is to evaluate the overall unit of work.

Assessment overview

This design problem can be altered to suit your school context and students' interests and ability.

The design problem has been written so that student work with a 'client' (the person running the stall) to design and produce marketing plans and material for a stall that will run at a school fete.

This stall can be food-related (such as hot dogs or ice-cream stall), activity-related (such as air-brush or henna tattoos or a splash tank) or the stall can be selling items (student artwork or knick-knacks).

If the school or community are not holding a fete then this unit can be adjusted to design and produce marketing plans and material for items that they may have previously made in the Design and Technology course.
